

**Purchasing Department
Notice of Award
9/15/20**

The non-competitive negotiation process will handle the above procurement. It has been determined that it is fiscally advantageous to use non-competitive negotiation since the procurement has been deemed an Emergency Purchase. Specifically, in this case the factors other than price are:

On August 10, 2020 Mike Kahle with the City of Martinsville water department was notified that a 25' long pipe had semi-collapsed causing manholes downstream to overflow. Prillaman & Pace was awarded the job due to availability and the urgency of this repair.

“At the first of August, we discovered that a 25' long section of pipe had semi collapsed, causing a severe restriction in the line, which caused the backup in the line. This line had dropped almost 20” at the lowest point. Prillaman had to pump down a small pond, install a manhole riser with a solid bottom, and build a support bracket for the pipe.

-Mike Kahle
Water Resources Director

“The installation of the pipe would prevent further Sanitary Sewer Overflows(SSO), which are a violation of EPA and DEQ regulations and a public health hazard.”

-Jeff Gauldin
Public Works Director

Requisition number 322 was entered and converted to Purchase Order #409 on September 15, 2020.
The amount of the award will be \$20,460

Zach Morris, Purchasing Manager
